WORK EXPERIENCE

On-Call Multimedia Specialist (Photography & Videography)

Make It Happen Photography Studio

Antipolo, Rizal

June 2025 – June 2026

- Captured professional photographs and videos for events, portraits, commercial shoots, and studio clients while ensuring high production quality.
- Produced promotional videos, advertisements, and social media content using Adobe Premiere Pro and After Effects to support the studio's marketing campaigns.
- Edited and enhanced photos using Adobe Photoshop and Lightroom, including color correction, retouching, and image optimization for client delivery.
- Collaborated with photographers, videographers, and clients to execute creative concepts while consistently delivering projects on schedule.

Full Stack Web Developer Intern

Aholdtech Philippines

Cainta, Rizal

Feb 2025 – May 2025

- Led a team of four interns in developing two corporate web applications for product showcasing and user activity monitoring.
- Developed responsive full-stack features using HTML/CSS, PHP, MySQL, Bootstrap, and Tailwind CSS, including authentication, admin dashboards, and product management modules.
- Participated in production deployment, code reviews, testing, and frontend-backend integration to ensure system stability and timely project delivery.

EDUCATION

Technological Institute of the Philippines

BS Information Technology

Quezon City

2021 - 2025

General Weighted Average (GWA): 1.70 / 1.00 (With Distinction)

PROJECTS

SalitAral: Mobile Learning App

2025

- Led development of a cross-platform mobile app (Flutter, Firebase) for deaf students' pronunciation training, coordinating a 3-person team and architecting the backend for real-time sync, authentication, and cloud storage.
- Engineered a haptic feedback system synced with 3D animations to simulate vocal vibrations, achieving a 5.38/6.0 evaluation rating across ISO 25010 standards.
- Integrated a Voice Activity Detection (VAD) algorithm for real-time speech-to-text conversion, enabling accurate voice-based pronunciation assessments.
- Optimized 3D asset loading and memory management, maintaining 60fps animations across Android devices.

TableSnap: OCR-Based Table Extraction System

2026

- Developed an OCR-based data extraction system deployed to 6 users in a business organization, automating table and form digitization into structured CSV outputs.
- Processed 200,000 records over 3 weeks via batch processing, eliminating a significant portion of manual encoding workload.
- Reduced per-task processing time from 15 to 5 minutes (67% efficiency gain) through an OCR preprocessing, table detection, and automated conversion pipeline.
- Applied image preprocessing and table recognition techniques to boost OCR accuracy, minimizing manual correction even for complex text layouts.
- Integrated a subscription-based access system with the PayMongo payment gateway for secure payments and tiered user access control.

SKILLS

Technical Skills: Proficient in HTML/CSS, JavaScript/TypeScript, PHP (Laravel), React, MySQL; Familiar with Python, Node.js, Flutter, Firebase Firestore, Supabase, Git, REST APIs, Postman

Creative Tools: Adobe Photoshop, Lightroom, Premiere Pro, After Effects, Illustrator
